Traditional Brick & Stone are delighted to present the Seventh edition of our catalogue, which contains the latest collection of colours and textures, produced using both modern and traditional manufacturing methods. With a continued commitment to providing our customers with quality products, underpinned by excellent service, we are confident that we can assist you to select the correct product for your project. This includes devising bespoke blends to address sensitive planning issues or specific customer requirements.

Case Study: Great Eastern Quays

Brick Type: Autrique, Zola,
Bembridge Antique

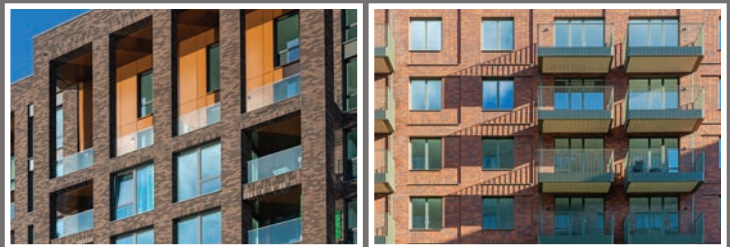

Location: London

Completed: 2020

In Partnership With
Galliford Try

Commissioned in 2013 the Great Eastern Quays were part of the massive redevelopment of the London docks providing 1,800 flats, commercial buildings and offices.

This part of London was previously known as "The gateway to the world" as it was situated at the end of the train line and passengers/cargo were then transported across the world from here. The design of the buildings was sympathetic to the warehouses, taking account of its heritage with a contemporary twist. Residents are able to enjoy architectural diversity in an urban setting overlooking the water. The contractors have utilised stack bonded brickwork features, both horizontal and vertical around the windows.

Case Study: Borough Yards

Brick Type: Borough Blend

Location: London

Completed: 2021

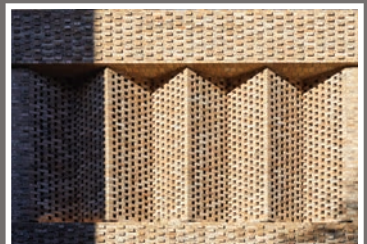

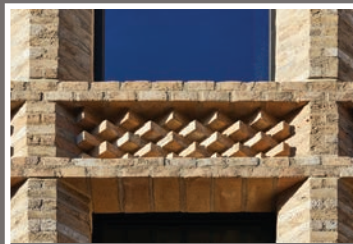

In Partnership With:
SPPARC & NR Taylor

Borough Yards, was completed in 2021 and is considered

London's most exciting cultural and retail focused regeneration. As a new destination to shop, eat, work, and play, Borough Yards is located next to the world famous Borough Market, and is based in and around a series of restored railway arches.

Borough Yards has won several prestigious awards with the vision to rejuvenate part of South London's Victorian railway heritage by repurposing 8500 square meters of existing railway arches, blending heritage with contemporary design.

The result is raw-brick, cathedral like spaces aimed at a new generation of visitors. This is where our strengths came through, as the project required a significant volume of bricks, including special shapes and unusual detailing.

The Traditional Brick and Stone range of Clay Pavers are the perfect solution for your domestic landscaping project. Used in pathways or as edgings, the richness of colours available from warm terracotta to mellow pinks and weathered yellows, provides a dramatic backdrop to your garden design.

Architectural Stone

TBS can make your designs a reality. We have the knowledge and experience to produce both standard and bespoke units to your requirements. We manufacture a complete range of stone, from drycast reconstituted, structural wetcast to Natural Limestone, all of which would enhance the appearance of your project.

Amongst our many capabilities, we provide a complete take off service supported by CAD drawings to confirm your designs. Site visits can be arranged to discuss your requirements in more detail. Should you require further information, or a catalogue, please contact the office or your local TBS representative.

The Linear Brick Range

Valcourt

Kalanit

Brandon

Ontario

- Modern sleek aesthetics
- Wide range of colours and textures
- Design versatility
- Environmental benefits
- Reduced raw material usage during manufacturing
- Less gas used during firing process
- Less mortar used during construction
- Larger volume payloads on vehicles
